ABOUT ME

I have been working as a ERP Oracle E-Business Software Developer since 2010.

I have experience in both R12 and Cloud EBS' versions. During this time I have been developing and maintaining new and existing Oracle based applications such as concurrent request processes, OAF pages, configurations, personalizations, performance and so on which were defined to meet customers requirements and necessities.

Furthermore, I am not only interested in Oracle's technologies stack. Consequently, I am a self-learning of Java Spring boot. I prefer to be in touch with the backend development.

EXPERIENCE

- DESPEGAR

Software Developer. Oracle E-Business Suite | June 2022 / Currently

www.despegar.com.ar

- SR EBS Developer R12.1.3
